Updated: 01/07/21 by Tom Lever

Welcome Page

Login Page

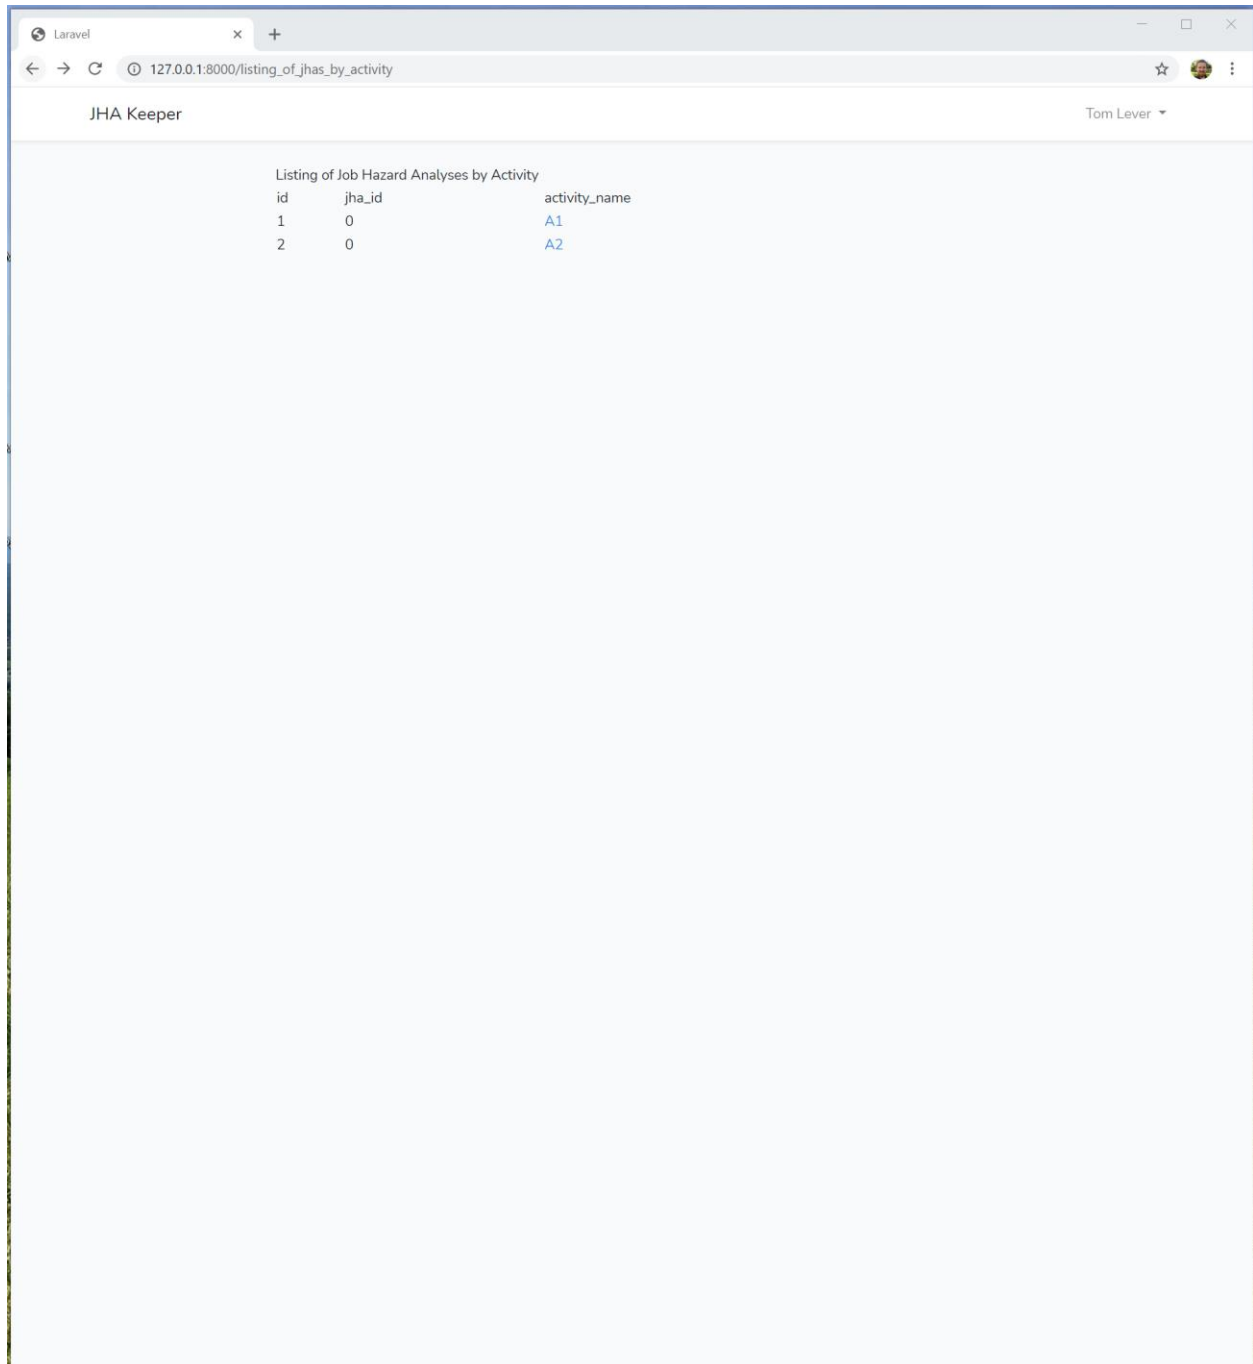

The screenshot shows a web browser window with the title 'Laravel'. The address bar displays '127.0.0.1:8000/login'. The page header includes 'JHA Keeper' on the left and 'Login Register' on the right. The main content area features a 'Login' form with the following elements:

- Login** (Form Title)
- E-Mail Address** (Label) with an input field.
- Password** (Label) with an input field.
- ☐ **Remember Me** (Checkbox and Label).
- Login** (Blue Button).
- [Forgot Your Password?](#) (Link).

Listing of JHA's by Activity

Goal 1: Fix values in jha_id column to match the first id in database table jhas corresponding to the relevant activity.

Note: Activity names A1 and A2 are hyperlinks to “/jha/{activity_name}”. Each page corresponding to each activity name contains an activity-specific JHA table with activity name, job steps, hazards, and controls. See below for a screenshot of the JHA table for activity A1.

Listing of Job Hazard Analyses by Activity		
id	jha_id	activity_name
1	0	A1
2	0	A2

Activity-Specific JHA Table: Activity A1

Laravel x +
127.0.0.1:8000/jha/A1 ☆ 🧑 ⋮

Job Hazard Analysis Table				
id	activity_name	job_step	hazard	control
1	A1	S1	H1	C1
2	A1	S1	H1	C2
3	A1	S1	H2	C1
4	A1	S1	H2	C2
5	A1	S2	H1	C1
6	A1	S2	H1	C2
7	A1	S2	H2	C1
8	A1	S2	H2	C2

JHA Form, Multi-Activity JHA Table outputted by PHP, and JSON Array outputted by JavaScript representing Multi-Activity JHA Table

Goal 1: Eliminate multi-activity JHA table outputted by PHP. Have JavaScript output all rows in multi-activity JHA table where the activity_name of that row is the same as the text in the form textbox with name activity_name.
